## ESET SMALL BUSINESS SECURITY

### ESET SECURITY MANAGEMENT CENTER

ALL ESET endpoint solutions are managed from a single pane of glass - ESET Security Management Centre that can be installed on Windows or Linux. As an alternative to installing, ESET has a virtual appliance that you can simply import for quick and easy setup.

ESET Endpoint Security for Windows Leverages a multilayered approach that utilizes multiple technologies in dynamic equilibrium to constantly balance performance, detection and false positives enabling organizations to :

- ✓ Protect against ransomware
- ✓ Block targeted attacks
- ✓ Prevent data breaches
- ✓ Stop fileless attacks
- ✓ Detect advanced persistent threats

#### MANAGEMENT SERVER

ESET Security Management Center manages endpoint products from a single pane of glass and can be installed on Windows or Linux. As an alternative to on-premise installation, customers with up to 250 seats can manage their endpoints via ESET Cloud Administrator.

#### MACHINE LEARNING

All ESET Endpoint products currently use machine learning in conjunction with all of our other layers of defense and have done so since 1997. Specifically, machine learning is used in the form of consolidated output and neural networks. For a deep inspection of the network, admins can turn on the special aggressive machine learning mode that works even without internet connection.

#### MULTILAYERED DEFENSE

A single layer of defense is not enough for today's evolving threat landscape. All ESET's endpoint products have the ability to detect malware pre-execution, during execution and post-execution. Focusing on the whole of the malware lifecycle, not just on a specific part, allows ESET to provide the highest level of protection possible.

## ESET ENDPOINT ANTIVIRUS

## ESET ENDPOINT SECURITY

### DETECTION & PROTECTION FEATURES

	Antivirus & Antispyware
	Anti-stealth protection
	Real-time file system protection
	Document protection
	Computer & Startup scan
	Initial scan & Auto-scan of removable media
	Host-based intrusion prevention systems
	Vulnerability shield
	Advanced memory scanner

	Exploit Blocker
	Native 64-bit scanning core
	AMSI Support
	Protected service & DLL modules
	UEFI scanner
	Advanced scanning of browser scripts
	Ransomware shield
	System-wide process exclusions
	System-wide object exclusions based on hash

### DEVICE CONTROL

	Determine device serial no., type & vendor
	Multiple devices in one rule

	Warning action (soft blocking rule)
	Date/Time -based scheduling

### SUPPORT FOR VIRTUALIZED ENVIRONMENTS

	Shared Cache
---	--------------

	Optimization for “revert to default snapshot”
---	---

### TWO-WAY FIREWALL

	Simple approach to rule evaluation
	Troubleshooting wizard

	Create firewall rule directly from log
	Botnet protection

### EMAIL PROTECTION

	Email protection
---	------------------

	Client Antispam
---	-----------------

### WEB PROTECTION & CONTROL

	Anti-phishing & Web access protection
	Multiple URLs in one rule

	Web control
	Date/time-based scheduling

### TOOLS

	ESET SysInspector & SysRescue
	Import and export settings

	Send notifications by email
	Diagnostic tools

### OTHER FEATURES

	Component-based installation
	Password protected settings
	ESET Enterprise Inspector support

	Detection of potentially unwanted apps
	ESET Security Management Center compatibility
	ESET Dynamic Threat Defense support

# PROFESSIONAL END-TO-END SECURITY FROM INDUSTRY LEADER ESET

## ESET SMALL BUSINESS SECURITY

Centrally managed security for desktops, mobile devices and file/email servers.

### All in one functionality with pick and choose flexibility

Business Security Packs offer the best of both worlds. Professional end-to-end security from industry leader ESET, and flexibility configured in a simple to deploy package – ideal for small businesses.

#### Cover it All with 1 License Key

Waste no time getting on with your business. Deploy the out-of-the box protection using a single license key, and extend the coverage to all the endpoints almost instantly.

#### Save Vs. Buying Separately

We've priced the Packs competitively, with small companies in mind. This means that you get the best of both worlds - protection that covers your needs at a price that does not strain your IT budget.

#### Combine Your Security Options

No matter the operating system on your computers or smartphones, protect them all. File Server and Endpoint Protection for Windows, macOS, Linux or Android as you need, without wasting a single license.

#### Always the Latest Protection

If there is a newer version of the installed products, upgrade for free. You will always have access to the latest technology. New computer in the network? Transfer the license and stay protected.

#### Manage Security Efficiently

Freeing up valuable IT resources, you can manage network security from one console. The solution's small system footprint extends lifetime of older machines.

#### Mail Security

Secures company mail traffic with proven detection technology. Protects the whole server - mailboxes and the server environment, no matter the operating system.
